Manufacturers Record

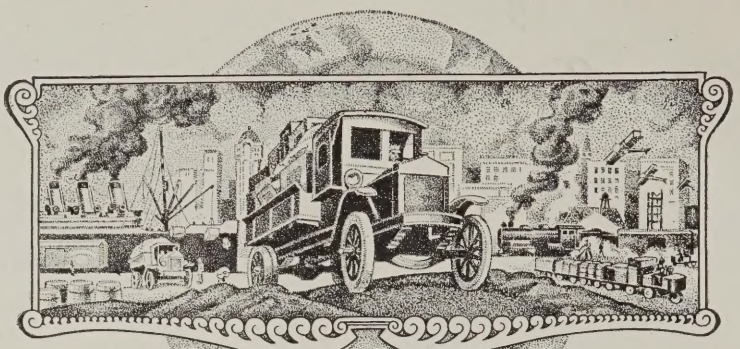
EXPONENT OF AMERICA

Can Increase Your Southern Sales

In studying and analyzing the advertising value of the Manufacturers Record, it is essentially important to keep in mind the fact that the Manufacturers Record has been covering the industrial, construction and general material development of the sixteen Southern and Southwestern States for the past forty years, and is widely read and consulted by those active in every phase of its commercial, industrial and public life.

Moreover, the Manufacturers Record is a paper which appeals editorially and in its news columns very strongly to the influential forces in its chosen field, because its work has directly and indirectly helped to increase and broaden every class of business.

In its Construction Department the Manufacturers Record covers in detail every branch of activity in the South and Southwest. This department runs annually nearly 50,000 items, giving details of all new enterprises:—plants to be erected and enlargements of or improvements to existing plants, new building and construction work of all kinds, public improvements, including roads, streets, sewerage, water works, etc., steam and electric railways, water powers and power plants, land drainage and reclamation, financial institutions, bonds, being voted and sold for public improvements; in fact every phase of industrial, commercial or public activity in the South and Southwest is covered in detail each week in the Construction Department of the Manufacturers Record, and in advance form through our Daily Bulletin service.



This brings the Manufacturers Record into constant and direct touch not only with those in executive and directing control of public and private enterprises, but also in continuous, close touch with architects, engineers, public officials, contractors and others who carry out the details, or in other words, those who select, decide upon, specify and buy the materials, equipment and supplies that are needed in this constructive work.

As a result, advertisers in the Manufacturers Record are able to reach in one medium those in active charge of established Southern industries as well as those who conceive and organize new undertakings, and those charged with bringing them into actual being, and it is this complete covering of its field that has made it possible for the Manufacturers Record to serve satisfactorily and in a profitable way the many important firms in the country who regularly use its advertising columns to extend their Southern sales.

Write for full information, with rates and A. B. C. Statement, covering the services the Manufacturers Record can render you for increasing and sustaining your Southern business.

Traffic World

GETS RESULTS FOR ITS ADVERTISERS

A weekly publication recognized by both shipper and carrier as the high authority on traffic and transportation.

Circulation widely distributed throughout the entire United States, over 80% of total circulation reaching big industrials.

Over 80% of our circulation renews automatically at a subscription price of $10.00 per year.

Essential and indispensable to big industrials because it furnishes authoritative data and information necessary to those who have serious problems of traffic and transportation to contend with.

Advertisers wishing to reach big industrials and big shippers with force and directness will find TRAFFIC WORLD a very powerful medium. A trial will convince you the same as it has others.

How To Find Information

This volume is compiled for the use of Executives who buy and sell, Purchasing Agents and Sales Managers.

It is divided into five sections as follows:—

1. Index to Trades.
2. Classified Trades.
3. Trade Names.
4. Alphabetical.
5. Index to Advertisers.

INDEX TO TRADES

When in the Market for any class of material or service consult the " Index to Trades " in the front of the book where will be found the classification number of the product or service required.

Cross indexing. In the " Index to Trades " all articles are thoroughly cross indexed, thus High duty pumping engines are indexed under " Engines, pumping, high duty," " High duty pumping engines " and " Pumping engines, high duty," so that however the article is looked for it will be readily found.

CLASSIFIED TRADES SECTION

Turn to the " Classified Trades Section " and using the classification numbers at the top of the page for guidance, find the desired classification under which the names of the principal firms will be found. Those printed in black faced type or using display space to announce their products or services are especially equipped to fulfill your requirements.

In the larger lists the arrangement is alphabetical by States and Cities, enabling you to select at a glance the names in any section of the country; in the other lists the arrangement is alphabetical for the whole United States.

Products are listed in the " Classified Trades Section " alphabetically according to the noun, except in the case of machinery and textile machinery and supplies, which for greater facility are brought together in two main groups. " Machinery " classifications 7671-9499 and " Textile Machinery " classifications 14993-15489a, under which the various kinds of Machinery are subclassified, each carrying its own classification number.

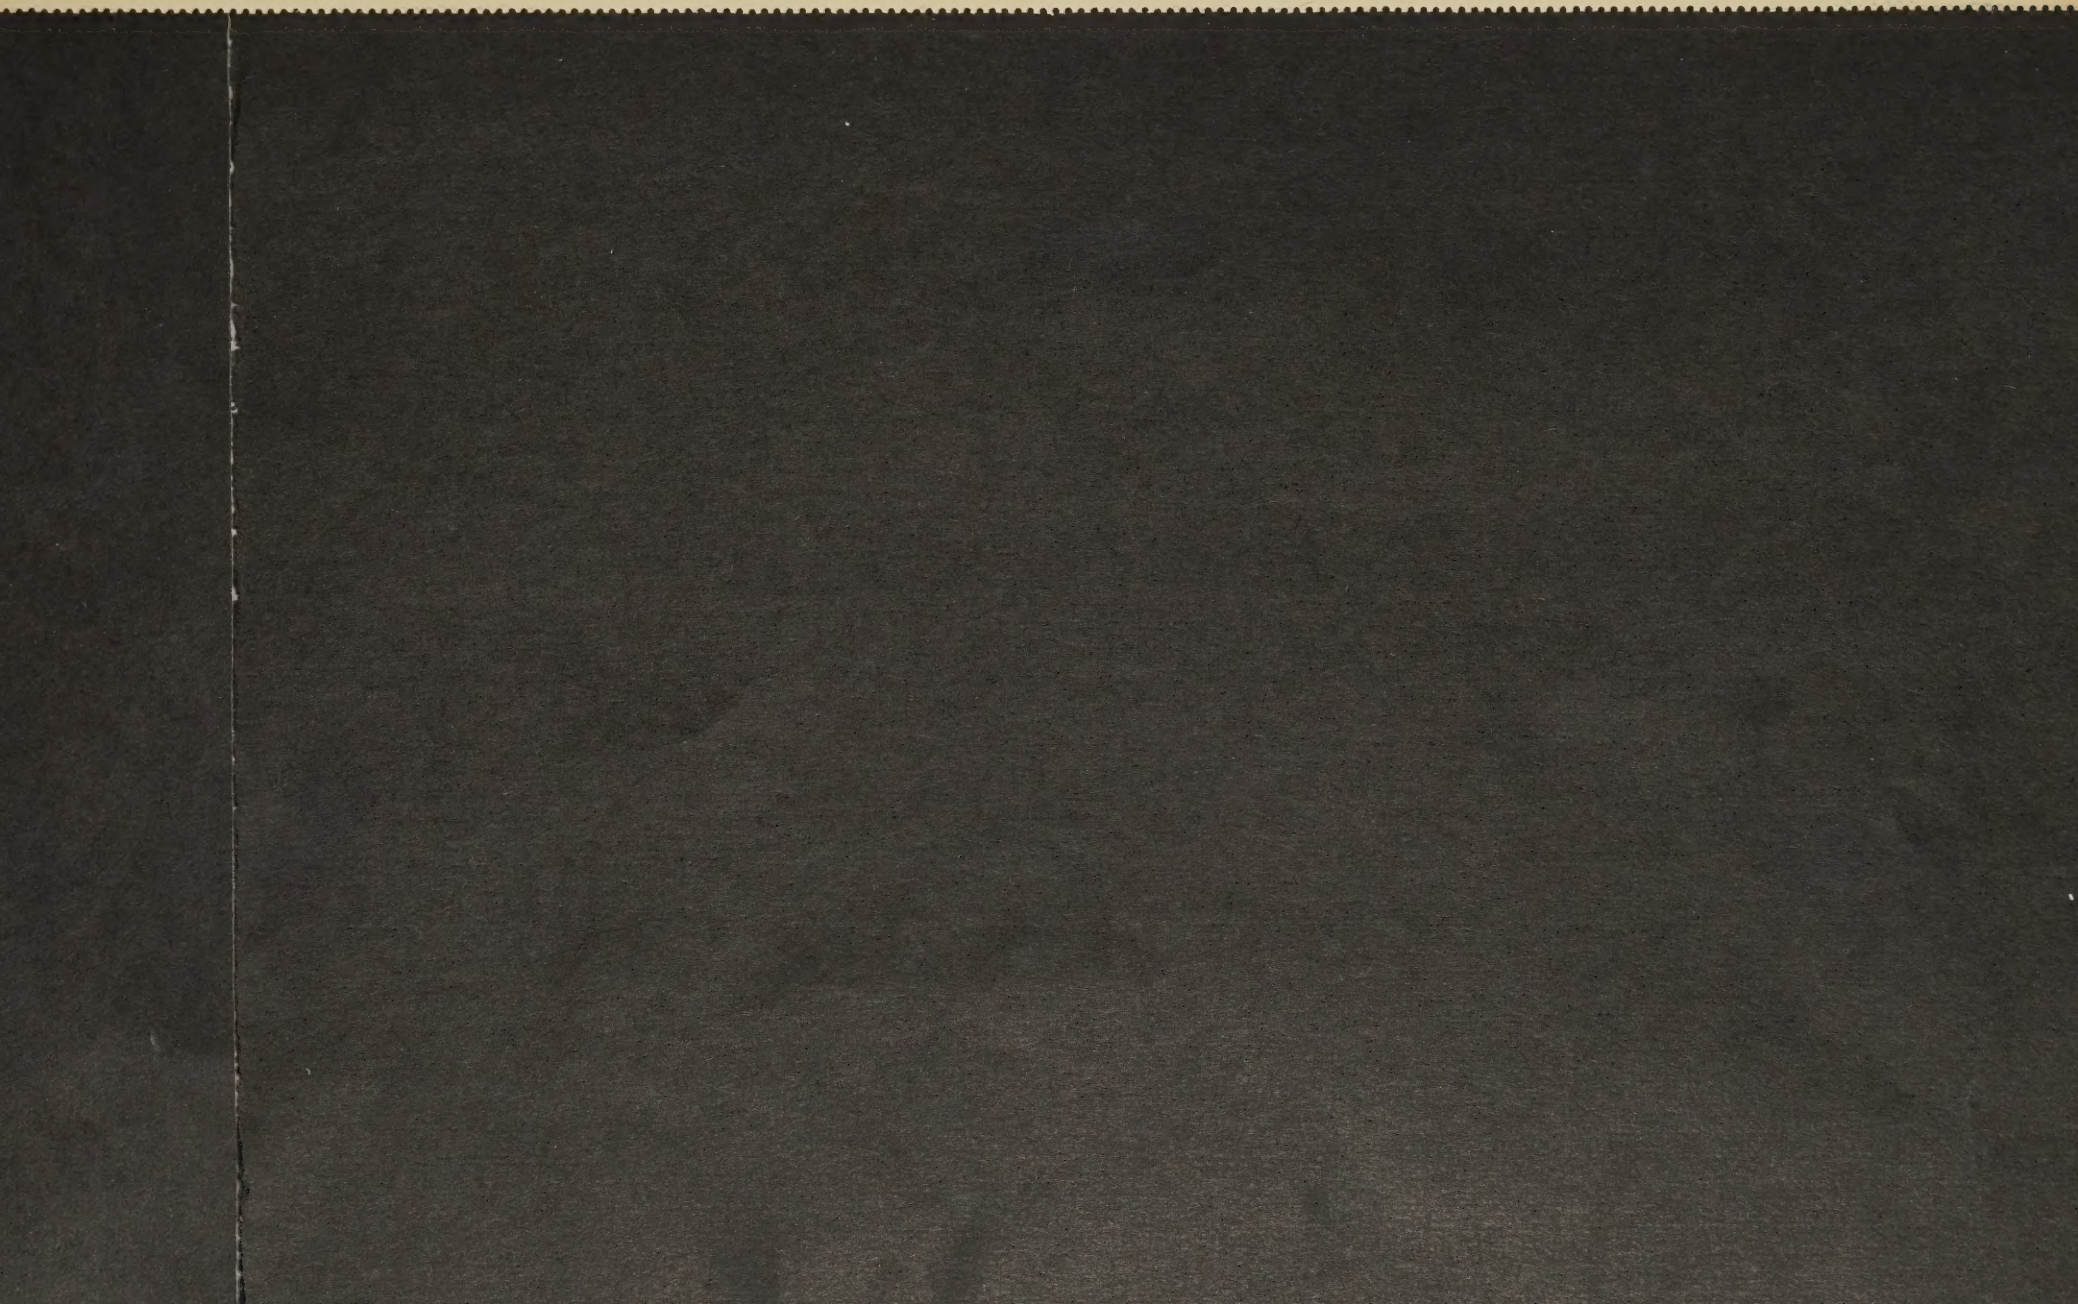
All firms operating a machine shop or foundry, in addition to being listed under their various products, are again shown in the list of " Machinists and Founders," classification 9502.

TRADE NAME SECTION

If you require an article manufactured under a special trade name or brand but do not know the name or address of the manufacturer, refer to the " Trade Name Section," where all leading trade names are listed alphabetically, followed by the name and address of the manufacturer.

ALPHABETICAL SECTION

When you know the name of a firm but do not know where it is located turn to the " Alphabetical Section," where you will find in one list all concerns listed in the book, together with their main product and address.



INDEX TO ADVERTISERS

When the line "See Adv. Index at end of book" follows any name, a reference to the " Advertisers' Index " at the back of the book will give the page number or numbers on which their display announcement appears, also give their branch offices, if any.

SERVICE BUREAU

A Service Bureau is maintained for the assistance of users of Hendricks' Register. In case you cannot find what you require write this bureau, which will endeavor to locate the article or manufacturer required and reply promptly. There is no charge for this service to subscribers to the book.

Although every effort is made to thoroughly revise HENDRICKS' COMMERCIAL REGISTER each year, it is inevitable in a work of this size that some errors or omissions creep in. The Publishers will appreciate information as to new firms which should be listed, or ones which should be eliminated, changes of address, etc. The attached p cards are provided to assist in furnishing this information.

IMPORTANT THE NUMBERS IN THIS INDEX REFER TO THE CLASSIFICATIONS DIRECT AND NOT TO THE PAGE NUMBER

INDEX TO TRADE CLASSIFICATIONS

FOR INDEX TO NAMES OF ADVERTISERS WITH THEIR BRANCH OFFICES, SEE END OF BOOK

NOTE.—The cross references following many of the classifications are inserted to draw attention to other branches of business connected with such classifications, and a little study of them will often result in the finding of desired information which at first glance might appear to be omitted.

Many of the names listed under the classifications to which this Index refers are followed by detail matter, trade names, etc. This information is invaluable to buyers and should be closely observed, as it is a special feature of the work. See also separate Trade Names, Brands, etc., Section page 1845.

Classifications which are marked thus* in the body of the Register are inserted for concerns using this publication for publicity purposes. Other concerns in similar lines of business will always be found under the standard classifications.

We earnestly hope that all new firms connected with the industries included in this Register will send us their business cards, and thus aid us to maintain our high standards of excellence.

Business changes, additions or corrections for the next edition will be thankfully received and INSERTED FREE OF CHARGE.

HENDRICKS' COMMERCIAL REGISTER

OF THE UNITED STATES

FOR BUYERS AND SELLERS

30th EDITION 1922

CLASSIFIED TRADES SECTION

Classifications marked thus * are inserted for concerns using this publication for publicity purposes. Other concerns in similar lines of business will be found under standard classifications.

Note.—The "Index to Classifications" should always be referred to when the desired information is not found in alphabetical order in the following pages. Many articles of a similar nature only appear under one general classification. For example, "galvanized steel sheets" cannot be found under the letter "G," but a reference to the "Index to Classifications" shows them at classification 6715, and when that number is looked at the required information is given under the listing of "Iron and Steel Sheet (Black and Galvanized)."

The Southern Architect and Building News goes only to buyers of building material and equipment. Every reader counts. There is no waste. Furthermore, the paper covers a territory not reached by other building papers. It is the most practical advertising that can be had.

Buy Quality, Not Quantity

In spending your publicity fund insist on getting QUALITY. Insist on reaching people who are in the market for goods in your line. Don't pay for waste circulation. Have a "say" in where your money goes.

Let us send you our rates for reaching select buyers. We can help you. Address:

BAKELITE-DILECTO

AN INSULATING MATERIAL WHICH WILL NOT DISAPPOINT YOU

It will stand up under the most severe tests, and still remain a perfect insulator. For instance, the ozone from high voltage electrical apparatus quickly ruins hard rubber, but has absolutely no effect on **BAKELITE-DILECTO.** Neither do weather changes affect it.

It is a very versatile material and can be used in a thousand and one insulating forms. It is supplied by us in Sheets, Tubes and Rods, or Machined into most any form specified. We are large manufacturers of **VULCANIZED FIBRE** and **CONTINENTAL-BAKELITE** in Sheets, Rods and Tubes and of **CONITE,** a thin Insulation furnished in Sheets or Rolls from .005" to .020" thick.

A booklet describing all of our products will be sent upon request.

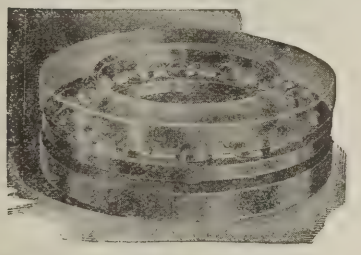
"NORMA"
PRECISION BEARINGS



"NORMA"
BALL BEARINGS

Open type, separable bearings of extremely high precision, rigidly mounted, silent running, with every element in workmanship and design contributing to high-efficiency, long-time service; notably successful in high-speed operation, being the standard bearings with most of the leading manufacturers of high-speed electrical apparatus.

"NORMA"
ROLLER BEARINGS

Heavy-duty, high-efficiency bearings pre-eminently adapted for service where shock, jar, vibration and sudden load variations must be encountered; double the load capacity of a ball bearing of the same dimensions; temporary overload capacity up to 50 per cent of their own rating; high-speed, quiet-running units of extreme precision and maximum durability.

"NORMA"
THRUST BEARINGS

Precision units affording maximum anti-friction efficiency under end thrust loads; designed to afford long-service durability and silent-running qualities; made in several styles, single and double, both without housings and with housings of several types giving self-contained advantages.

"NORMA"
COMBINATION BEARINGS

Self-contained units affording perfect adjustment and maximum anti-friction efficiency under combined radial and thrust load; two types—combined annular and ball thrust, and combined roller and ball thrust; distinguished by high precision, open type construction, rigid mounting, silent running and high-speed qualities.
